Background

As part of its verification responsibilities under California's RPS program, the Energy Commission's Renewable Energy Division offers a review of its analysis of the historic carryover (HCO) RPS claims reported by local publicly owned utilities (POUs). Under HCO, POUs that procured electricity from qualifying renewable energy resources from January 1, 2004, through December, 31, 2010, that was in excess of their 2004-2010 RPS procurement targets may apply that excess amount to later procurement requirements. A POU may count verified HCO towards meeting its RPS requirements for the 2011-2013 and later RPS compliance periods in accordance with Section 3206 (a)(5) of the Energy Commission's RPS POU regulations.

This workshop will include a presentation and review of the HCO RPS claims verified by staff to date. After the workshop, staff will make any needed revisions to its RPS data

analysis, and then finalize and report the verified HCO amounts in the POU's 2011-2013 RPS Verification Report, which is expected to be released in mid-2016.
